Garden Center

Santa Barbara, CA

Driwall™ Rainscreen 020-1

Driwall™ Rainscreen 020-1 is a drainage mat for exterior wall systems. The entangled net product eliminates incidental moisture problems in most exterior veneer applications, including stucco, manufactured stone and plank siding.

Santa Barbara, California, known for its mountain views and long stretches of pristine beaches, is one of the most beautiful cities to visit in the United States. Tourists from all across the world choose Santa Barbara as their vacation destination. Whether you are hiking the trails or walking the ocean shoreline, the appealing views are everywhere you look.

One great spot to explore is this breathtaking Garden Center in the heart of Santa Barbara. Hike through the garden one trail at a time and experience all of the beauty it has to offer!

One area of the garden center, known as the Conservation Center, which is surrounded by stunning views of the Santa Ynez Mountains and the Santa Barbara Channel, features Keene Building Product's Driwall™ Rainscreen 020-1.

Driwall™ Rainscreen 020-1 is a drainage mat for exterior wall systems. The product eliminates incidental moisture problems in most exterior veneer applications. In this case, Stucco was used as the siding when installing Driwall™ Rainscreen 020-1. The full-wall entangled net product rolls over the water-resistive barrier to separate it from the exterior veneer. The airspace that it creates increases airflow through the wall cavity, allowing the wall to breathe and stay dry.

Draining and Drying are two extremely important aspects for the proper life span of any exterior veneer, and Driwall™ Rainscreen 020-1 provides that in one product!

Without the worry of mold and decay in the wall system, the building will be preserved for years to come!

DRIWALL™ Products – the right way to stay Dry!
