

ARE YOUR FOUNDATIONS PROTECTED?

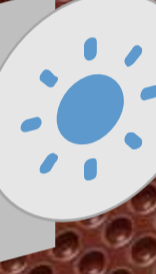

For foundation protection that lasts, spray dampproofing isn't enough. Only Dörken's DELTA®-MS has a vacuum-formed dimple pattern with Air-gap Technology that keeps basements protected.

DAMPPROOFING VS DELTA®-MS

INSTALLATION

-  Require costly, specialized equipment
-  Extended installation time for fumes to dissipate and product to cure
-  Application delays due to weather conditions

INSTALLATION

-  Provides long-lasting, impermeable protection
-  Easy to install - just roll it out and nail it on
-  No special equipment or delays due to weather

1 YEAR

-  Uneven application allows moisture into walls
-  Even properly applied sprays start to break down

1 YEAR

-  DELTA®-MS blocks moisture from entering the system
-  Incidental water passes down to footing and away from wall

3 YEARS

-  When foundations crack, sprays crack
-  This allows more moisture to get into the basement
-  This means call-backs and warranty claims

3 YEARS

-  Stands up to the most extreme conditions
-  Made of 60% recycled and 40% virgin HDPE
-  The most durable dimple sheet on the market

10 YEARS +

-  Much of the spray protection has oxidized and disintegrated
-  Foundations are exposed to constant moisture

10 YEARS +

-  Your foundation is still dry and protected

When applied by a DELTA® Certified Installer, DELTA®-MS offers the industry's best leak-proof and material warranty.

DELTA®-MS. It's better for your building, your reputation – and your bottom line.
