

JetSpray[™]
Thermal

The Premium
Performance Spray-On
Insulation Solution

KNAUFINSULATION
it's time to save energy

JetSpray™ Thermal Insulation

The high-performance, spray-on insulation system is designed for a net-less, side wall application. Ideal for projects ranging from residential and multi-family dwellings to modular or light commercial structures, JetSpray offers both thermal and acoustic comfort with efficiency.

The High-Tech Solution for High-Performance Homes.

PROFESSIONAL

JetSpray[™] Thermal Insulation delivers professional results by providing a custom solution for every application.

- Installers are field-trained by Knauf Insulation to ensure the highest levels of acoustic and thermal performance are achieved.
- The system incorporates quality checks to guarantee that JetSpray Thermal Insulation is installed correctly on every application.
- Knauf Insulation's manufacturing process incorporates calculated amounts of water-activated adhesive into JetSpray fibers—taking the guesswork out of a hassle-free installation.
- To help installers achieve accurate density, the Knauf Insulation mobile app offers fiber flow test and water flow test calculators for easy adjustment.

EFFECTIVE

JetSpray provides maximum coverage, with limited wasted product—in a quick, efficient installation.

- Drywall can typically be installed the next day, minimizing impact on production schedules.
- Installation leaves no gaps or voids in cavities, providing maximum coverage that reduces callbacks.
- Knauf Insulation's glass fibers are innately mold-resistant and do not support microbial growth, reducing builder liability.
- Scrubbed material is vacuumed and reused, eliminating wasted fiber and wasted cost.

HIGH-PERFORMANCE

JetSpray Thermal Insulation doesn't settle, maximizing comfort over time and limiting expensive callbacks.

- Delivers maximum R-values of an R-15 in a 2x4 cavity and an R-23 in a 2x6 cavity.
- System provides ultimate thermal and acoustic comfort and efficiency for the homeowner.

THE ULTIMATE WALL SYSTEM

To build the ultimate wall, combine JetSpray™ with ECOSEAL Plus™ Air Sealant to form a total air barrier within the building envelope. The ultimate wall provides better comfort, energy-efficiency and sustainability. Become an authorized installer for both by visiting ecosealplus.knaufinsulation.us
