BUILD WITH US.®

LP® TechShield® Radiant Barrier Sheathing Installs Like Conventional Roof Sheathing...

Building a more energy-efficient home doesn't take any additional time or labor. All it takes is LP® TechShield® Radiant Barrier Sheathing. With a thin, durable layer of aluminum pre-laminated to an OSB panel, LP TechShield sheathing creates a highly effective radiant barrier.

And Reduces Monthly Cooling Costs By Up To 17%!

Because it helps block radiant heat from entering a home, LP TechShield sheathing can reduce your customers' monthly cooling costs by up to 17%. That's built-in savings that start immediately and last for years to come. And an easy way to increase the buyer appeal of every home you build.

Only LP® TechShield® Radiant Barrier Sheathing has VaporVents™ technology. Created with our post-lamination incising process, it permits trapped moisture in the panel to escape.

Patented VaporVents™ Technology Prevents Moisture Build-Up During And After Construction

Only LP TechShield sheathing features VaporVents™ technology. Created with our patented post-lamination foil incising process, it allows LP TechShield panels to dry more quickly than other radiant barrier panels when moisture occurs during construction. It also allows for continued moisture evaporation after installation. No other brand of radiant barrier sheathing offers this unique, important feature.

All From The #1 Radiant Barrier Brand

Over the last decade, LP TechShield sheathing has grown to become America's #1-selling radiant barrier brand. That's one more reason to trust the homes you build to this proven performer.

The "Everybody Wins" Warranty

We back LP TechShield Radiant Barrier Sheathing with an industry-leading 20-Year Transferable Limited Warranty. So you and your buyer get two decades of peace-of-mind protection. Choose the smart, simple way to build more energy-efficient homes. Build with LP TechShield Radiant Barrier Sheathing.

Without LP® TechShield® Radiant Barrier Sheathing

As the summer sun beats down on a home, radiant heat transferred through conventional roof sheathing panels turns the attic into an oven.

With LP® TechShield® Radiant Barrier Sheathing

LP® TechShield® Radiant Barrier Sheathing blocks up to 97% of the radiant heat in the panel from radiating into the attic, reducing attic temperatures by as much as 30° F. This creates cooler rooms below and increases the efficiency of the in-attic air handling system.
