

- **Keeps A Home's Attic Up To 30° F Cooler**
- **Installs Like Conventional Roof Sheathing, Requiring No Additional Labor**
- **Designed For Optimum Stability In Both Directions**
- **20-Year Transferable Limited Warranty**

The #1 Brand of Radiant Barrier Sheathing

Lowers Monthly Cooling Bills As Much As 17%

Installed in more than 1.5 million homes to date, LP® TechShield® Radiant Barrier Sheathing is the industry's best-selling brand of radiant barrier sheathing. With a 15-year track record of proven success, LP TechShield sheathing is a cost-effective way to boost a home's energy efficiency and improve HERS ratings.

Post-lamination incising prevents glue from clogging and allows panels to dry more quickly than other radiant barrier sheathing. The 100% OSB substrate promotes breathability and does not create a vapor barrier. And only LP TechShield sheathing features a durable layer of aluminum with patented VaporVents™ technology.

The Product You Need, When You Need It

LP is the world's #1 OSB producer and the leader in strand technology across a variety of engineered wood products. Consistent product quality and regional product availability help ensure that LP TechShield Radiant Barrier Sheathing and all of our products are available where and when you need them. And when you use LP products, you have access to world-class customer service and local market product support.

Without LP® TechShield® Radiant Barrier Sheathing
