†Compared to an under-insulated attic. †Up to 28% heating and cooling savings based on Hot 2000, Version 8.7 run for a 2 storey 1972 type base house with 1149 sf per floor for an increase from R-8 to R-40 in the attic plus an increase from zero to R-20 in the basement walls in Canadian climates. †Based on an average attic size of 1700 SF with existing R19 insulation, averaged over 7 cities in Canada. **73% recycled content is based on the average recycled glass content in all Owens Corning fiberglass batts, rolls and unbonded loosefill insulation manufactured in Canada, SCS certified.

DO YOU HAVE ENOUGH INSULATION?

You can save up to 28%* on heating and cooling costs when you re-insulate your basement walls as well as your attic.

You can start by topping up your attic to at least 22 1/4" of blowing wool insulation to meet the recommended standard of R60.

Your home will be more comfortable while you save money on heating and cooling costs.

Re-insulate
your attic and
SAVE!

Insulate with **PROPINK®** insulation and Start Saving!
