

OSI[®]

Professional Grade Adhesives & Sealants

PVC Trim Installation System

The OSI[®] TRIMTeQ[™] System is specifically designed for exterior PVC trim installs.

It features innovative fastening and sealing products along with a comprehensive training program designed specifically for cellular PVC trim installation. It is formulated to maintain long lasting durability and aesthetics that home owners expect.

PVC Trim products will expand and contract with changes in temperatures. A proper installation utilizing the TRIMTeQ[™] system will minimize the movement that occurs due to changes in temperatures and help maintain a long lasting quality installation.

Traditional install

TRIMTeQ System

Professional Grade Adhesives & Sealants

TeQMount™:
Designed to mount cellular PVC trim to the home.

TeQBond™:
Designed to adhere miter and scarf joints.

TeQFasteners™:
Concealed system designed to mechanically fasten & fill holes.

QUAD®:
A key component in the TRIMTeQ™ System. Recommended for finishing sealing applications.

EP-1000:
A key component in the TRIMTeQ™ System. Recommended for situations requiring expansion joints.

1. Mount the trim board to the home with TeQMount™
 - Fast grab
 - Bridges gaps
 - Durable & strong

2. Secure with TeQFasteners™
 - Hidden fastening system
 - High connection strength

3. Adhere miter joints with TeQBond™
 - Durable bond
 - Precise control applicator

4. Insert PVC plugs to fill holes with TeQFasteners™
 - Setting tool ensures proper depth for plugs
