

Type NM-B CCA Conductor

600V | Premium Copper-Clad Aluminum (CCA) Building Wire

Engineering Specifications:

- **Standards:** UL-83, UL-719, UL-1581, UL-2556, ASTM-B-566
- **Listings and Compliance:** UL: E492024, E510284 and E538020, ETL: 5021266, RoHS Compliant, REACH Compliant
- **Construction:**
 - **Circuit Conductors** – UL recognized component (DVVV2); sizes 12-10 AWG: solid, annealed THHN CCA; sizes 8 AWG and larger: stranded, annealed THHN CCA
 - **Grounding Conductors** – UL recognized component (DVVV2); sizes 12-10 AWG: solid, annealed CCA; size 8 AWG: solid, annealed, insulated CCA; sizes 6 AWG and larger: stranded, annealed, insulated CCA
 - **Conductor Insulation** – Color-coded Polyvinyl Chloride (PVC) compound meeting the required thickness of Type THHN/THWN with a heat-stabilized nylon jacket rated for 90°C in dry locations
 - **NM-B Jacket** – 30-mil flame-retardant PVC to product safety standards; colored according to industry norms and specific application
- **Identification:** Copperweld® NM-B cable is identified for use with wiring devices, splice connectors and equipment terminals rated for CC, Cu, Cu/Al and CO/ALR. Copperweld® Copper-Clad Aluminum (CCA) is not dissimilar metallurgically to copper, brass or zincplated steel. Copperweld® CCA is dissimilar to aluminum for making electrical connections. If splicing with twist-on splice connectors, pre-twisting is not required. Copperweld® NM-B Cable is made with ASTM B-566 Copper-Clad Aluminum bare wire, which carries its own component listing, DVVV2, and is an NEC requirement.
- **Applications:** Refer to Article 334 of the NEC.

- 1 Copperweld CCA conductor
- 2 THHN / THWN-2 insulation
- 3 Paper separator
- 4 PVC NM-B jacket

4/3-G	3/3-G	7	6/7	0.040	0.006	0.843	315.91	65

* Jacket thickness for NM-B cable is 30 mils

** Ampacity of NM-B conductors is based on NFPA 70 (NEC) Table 310.16 for a temperature rating of the conductors of 60°C according to article 340.80 (Ampacity for NM-B Cable).
